

Coleman Stone

JUNIOR FRONT-END DEVELOPER | WEB DEVELOPER

PROFILE

Informatics graduate pursuing junior front-end and web developer roles. Brings practical IT support experience across client environments, a user-focused approach to interface design, and a creative background in music production and audio technology.

TECHNICAL SKILLS

WEB HTML, CSS, responsive design, accessibility fundamentals

TOOLS GitHub, Microsoft 365, PowerShell

AUDIO audio production, live sound, music performance, music instruction

PROFESSIONAL EXPERIENCE

IT Support Technician | *MissionMSP*

FEB 2025 - OCT 2025

- Provided day-to-day IT support for approximately 10 client organizations, resolving issues from printer failures and desktop troubleshooting to Windows configuration problems.
- Created PowerShell scripts to execute targeted remediation actions and help restore affected computers more efficiently.
- Applied clear, client-focused communication to diagnose issues, guide users through solutions, and maintain reliable daily operations.

Music Instructor | *Rhum Academy*

AUG 2022 - PRESENT

- Teach approximately 30 students of all ages in guitar, piano, and drums, adapting instruction for beginner through advanced goals.
- Create individualized learning paths that build technical skill, confidence, and sustained engagement with music.

Main Audio Technician | *Bridgeway Kokomo*

SEP 2026 - PRESENT

- Serve as the primary audio technician, supporting clear and reliable sound for church services and events.

Student Ministry Worship Director | *Bridgeway Kokomo*

JAN 2026 - PRESENT

- Lead worship for the student ministry and support a focused, engaging environment for students.

SELECTED PROJECTS

Car Valuation Web Application | *PHP, relational database, web forms*

- Collaborated on a web application that lets users register, sign in, submit vehicle information for valuation, and review a history of previous valuations.
- Contributed to readable page layouts and clear instructions that help users navigate forms and complete the valuation process.

Color War Game | *Python, Pygame*

- Built a grid-based simulation in which colored factions compete for territory, with configurable grid and faction settings.
- Developed an interactive Python/Pygame project that demonstrates simulation logic, configurable behavior, and iterative code organization.

EDUCATION

Bachelor of Science in Informatics | *Indiana University Kokomo*

APR 2026
